Contact Person and Title: _____

Contact Phone Number: _____

Description of Job-Site (i.e., type of project being constructed - commercial concrete tilt-up, single family dwelling, etc., include square footage): _____

Waste Prevention

Before and During Construction and Remodeling Projects

Describe all waste prevention strategies your company uses. Example: Reuse of landscaping during site preparation (relocating plants, chipping and using wood waste on-site); favoring designs using standard sizes (eight-foot lengths) to reduce cut-offs of lumber and wallboard. Purchasing Practices: asking suppliers to deliver supplies in returnable pallets or containers, Using salvaged items. At job-sites: Re-using formwork; centralizing woodcutting operations to make it easier to find cut-offs to reduce the need to cut full-length lumber, and finding specific uses for off-cuts.
